Paper Company Finds the Solution to its Wire Woes

MODEL T FERROUS TRAP

Problem:

Pieces of bailing wire were wreaking havoc on the machinery at [Grays Harbor Paper](#). Wire remnants were constantly plugging up the refiner plates, which resulted in breakdowns, loss of production time and excessive maintenance costs.

Solution:

Eriez® suggested that the paper manufacturer install a [Model T Ferrous Trap](#). Eriez Magnetic Traps have a constant, powerful magnetic circuit that is designed to attract and hold iron contamination, with no moving parts. These Rare Earth ferrous traps feature rugged welded pipe and reinforced construction to withstand harsh environments.

Result:

Since installing the Eriez Model T Trap, Grays Harbor Paper reports that their problems with bailing wire have been greatly reduced. When the T Trap is taken apart daily for cleaning, the operators can see all of the trapped contamination. This offers positive proof that the T Trap is doing its job.

Note: Some safety warning labels or guarding may have been removed before photographing this equipment.
