RECYCLING INDUSTRIES

Interstate Shredding Revenues Increase with Total Metal Recovery Equipment

Located on a 28-acre facility in Girard, OH, **Interstate Shredding** took major steps to become more profitable in the competitive world of scrap metal recovery. Interstate utilizes a ProSort[®] and FinesSort[®] Metal Recovery System, Drum Magnets, Pulley Magnets and Eddy Current Separators, all made by Eriez[®]. The process to recover the most fines is like a well-oiled machine at Interstate, with each piece of Eriez equipment playing an integral role in the process. The result is maximum recovery of all valuable metals both large and small. As Co-President Michael Clayman says, "The Eriez equipment is capturing metals that used to end up in landfills. It's like pennies from heaven."

The Beast Has Been Unleashed! P-Rex™ Permanent RE Xtreme Drum

This revolutionary Rare Earth drum contains magnetic power edge-to-edge and offers unmatched meatball separation. P-Rex out performs other electro-magnetic drums by as much as 30%-- without needing a transformer or DC power supply. Electro drums have one "flip" to help clean material from the original pick-up. The P-Rex has at least 3 potential flips. That means better separation and more profits!

New & Improved ProSort II

Recovering smaller pieces of metal--even wire--is now more efficient because the ProSort II features twice as many sensors per paddles than the original ProSort. It offers superior metal recovery at a fraction of the cost to operate and maintain an air-driven sorter.

Eddy Current Separators

Available in four strengths and feed widths (12 to 84 inch; 305 to 2134 mm), these powerful units separate aluminum and other ferrous metallic from nonferrous material such as municipal solid waste, bottom ash, commingled recyclables, plastic, glass, foundry sand, electronic scrap and ASR.

New Recycling Industry Literature

Choose the right Eriez product for your recycling needs with "Equipment for the Recycling Industry," which gives an overview of more than a dozen products to help increase production and profits. To request this brochure in PDF or hard copy format, contact [Eriez](#).
